

SereneCam

A Low-Cost, Microexpression-Based Intelligent System for Monitoring Mental Health to Maintain Employee Work Performance

Problems

The Silent Productivity Killer

Employee burnout, stress, and mental fatigue are often invisible. These issues silently drain productivity, increase errors, and a decline in work quality. Managers are left guessing why performance is dropping.

High Cost of Employee Turnover

A negative or stressful work environment is a primary reason talented employees leave. Replacing an employee is expensive and time-consuming.

Solutions

Early, Data-Driven Detection

SereneCam's AI analyzes subtle micro-expressions in real-time. It provides objective, confidential insights into employee well-being,

Proactive Support & Intervention

Instead of reacting to a crisis, our system sends discreet alerts to the manager's dashboard. This empowers leadership to offer timely support

Our Feature

Smart AI Monitoring

With SereneCam, company can monitor the mental health conditions of their employees in real time through the app. Our smart AI monitoring features include:
